

## Billing for the Infant's Mother

The medical provider may bill for the mother if s/he takes the mother's history, examines the mother's breasts and nipples, observes a feeding and makes a diagnosis and treatment plan for her.

The mother's insurance may require a request from her primary health care provider. The mother may be billed as either a new patient visit or a consult (99241-99245) if you have a request and provide a written report back to the requestor.
